Across the globe, companies and governments are creating the world of tomorrow. They are building vital infrastructure, developing projects, restoring landscapes and renewing their economies with sustainability in mind.

Golder is an employee-owned, global organisation providing consulting, design, and construction services in our specialist areas of earth, environment, and energy through technical excellence, innovative solutions and award-winning client service.

Employee owned since being founded in 1960, our more than 7,500 people operating from 155 offices worldwide deliver deep technical understanding, cross-disciplinary thinking and a passion to help our clients succeed. Our clients represent the world’s major industries and drivers of development: Oil and Gas, Mining, Manufacturing, Power, and Infrastructure.
Golder in Indonesia

Operating in Indonesia since 1994, we bring a wealth of local knowledge and experience to our clients’ projects, supported by more than 60 years of global expertise and technical excellence.

From offices in Jakarta and Balikpapan, we provide engineering and environmental consulting services for public and private clients across various sectors, including mining, oil and gas, manufacturing, infrastructure, and power. We apply our talent for innovative problem solving to a wide range of projects, where we address our clients’ needs for geotechnical, environmental, social, health and safety expertise.

With a strong footprint in the Indonesian resources sector, we have been involved in the largest mining projects in the country, supporting mine development, operation, and closure. Utilising the latest digital engineering tools and applications for analysis, modelling and presentation, our team of local and international specialists are also supported by our own soil and rock testing laboratory.

Our technical strengths are complemented by strong focus on client relationships. We understand our clients’ commercial realities and local business practices, which enables us to develop innovative and cost-effective solutions that will help them reach their strategic goals.

Benefits of working with Golder

Our global reach
With employees worldwide in offices in Africa, Asia, Australasia, Europe, North America and Latin America and clients on six continents, we bring the global expertise and experience you need to solve your most complex problems.

Our commitment to sustainability
Golder is committed to promoting sustainable communities and responsible development by embedding the principles of sustainability into project planning, design, execution, and operation, and by delivering products and services for sustainable development.

Moreover, we are committed to conducting our business and operations in a manner that has a positive impact on the communities in which we live and work. Our sustainability relies on using resources prudently, reducing our environmental footprint, and supporting a better quality of life for people around the world.

Our commitment to health and safety
At Golder we care about the health and safety of our people, our business partners and contractors, and our clients. Caring is quite simply at the core of our culture. We make it a priority every hour of the day to ensure our people are working and living in a way that keeps them, their families and their communities safe and healthy. We extend this caring to our contractors, vendors and clients in every project we undertake.

Our dedicated people
As an employee-owned company, our people are truly invested in, committed to, and are the primary beneficiaries of, Golder’s success. This commitment sets us apart in every aspect of what we do. Our clients know they are working with people who own the business and the outcome. Our passion, expertise and level of commitment are, and always will be, our most valuable assets.
