Europe & Middle East

CAPABILITY STATEMENT
About Golder

Across the globe, companies and governments are creating the world of tomorrow. They are building vital infrastructure, developing projects, restoring landscapes and renewing their economies with sustainability in mind.

Golder is an employee-owned, global organisation providing consulting, design, and construction services in our specialist areas of earth, environment, and energy through technical excellence, innovative solutions and award-winning client service.

Employee owned since being founded in 1960, our more than 7,500 people operating from 155 offices worldwide deliver deep technical understanding, cross-disciplinary thinking and a passion to help our clients succeed. Our clients represent the world’s major industries and drivers of development: Oil and Gas, Mining, Manufacturing, Power, and Infrastructure.
Golder in Europe & Middle East

Operating in Europe and the Middle East since 1973, we bring a wealth of local and global knowledge and experience to our clients in the transport infrastructure, oil and gas, mining, power, and manufacturing sectors.

With a regional footprint spanning 13 countries and 30 offices, we deliver engineering and environmental services to a wide range of projects, supported by a cross-disciplinary team of 850 people, ready to thrive on challenges in your next project.

We bring 60 years of geotechnical engineering experience, delivering strategic and technical advice, from site investigation, to design and construction, utilising the latest digital engineering tools.

From local infrastructure, renewables and waste to multinational industrial clients, we are working on environmental assessments, remediation, regulatory compliance, landfill design, permitting and environmental compliance to create resilient and sustainable outcomes aligned to our clients’ vision.

We think differently about sustainability, applying circular economy principles to identify business opportunities to help our clients create value and compete in new ways.

Our technical excellence, coupled with diverse industry experience and demonstrated project outcomes, makes Golder your ideal partner in Europe.
Benefits of working with Golder

Our global reach
With employees worldwide in offices in Africa, Asia, Australasia, Europe, North America and Latin America and clients on six continents, we bring the global expertise and experience you need to solve your most complex problems.

Our commitment to sustainability
Golder is committed to promoting sustainable communities and responsible development by embedding the principles of sustainability into project planning, design, execution, and operation, and by delivering products and services for sustainable development.

Moreover, we are committed to conducting our business and operations in a manner that has a positive impact on the communities in which we live and work. Our sustainability relies on using resources prudently, reducing our environmental footprint, and supporting a better quality of life for people around the world.

Our commitment to health and safety
At Golder we care about the health and safety of our people, our business partners and contractors, and our clients. Caring is quite simply at the core of our culture. We make it a priority every hour of the day to ensure our people are working and living in a way that keeps them, their families and their communities safe and healthy. We extend this caring to our contractors, vendors and clients in every project we undertake.

Our dedicated people
As an employee-owned company, our people are truly invested in, committed to, and are the primary beneficiaries of, Golder’s success. This commitment sets us apart in every aspect of what we do. Our clients know they are working with people who own the business and the outcome. Our passion, expertise and level of commitment are, and always will be, our most valuable assets.
Services

Golder delivers the following consulting, design, construction and operations support services to our clients.

Engineering
- Construction, material engineering,
- Testing and instrumentation
- Decommissioning and demolition
- Foundations
- Ground engineering
- Mine waste management
- Ground investigations
- Rock and soil stability
- Tunneling and shafts
- Waste management

Environmental
- Atmospheric services
- Environmental, health and safety and industrial hygiene
- ESIA, permitting and planning
- Human health and toxicology
- Investigation, remediation and reclamation
- Sustainability, carbon and climate

Water
- Coastal and marine
- Dams and hydropower
- Groundwater/water management
- Surface/storm water and hydrology
- Water and wastewater treatment

Strategic planning and management
- Digital solutions
- Mergers and acquisitions due diligence
- Mine planning
- Mine closure
- Program management
- Risk assessment and decision analysis
